**RECLAIMARBOR.COM SEEKS LARGE QUANTITIES OF WASTE WOOD  
Old Wood Kept Out of Landfill & Remanufactured Into Wood Paneling**

**Pittsburg, CA.** – [ReclaimArbor.com](http://ReclaimArbor.com) is seeking large quantities of waste wood to remanufacture into wood paneling.

Founded in 2017, Reclaim Arbor LLC reuses and recycles wood fencing and boards by re-milling the worn-out lumber into attractive wood paneling.

According to George Chao, Founder of Reclaim Arbor LLC, “Our need for old waste wood is driven by the amazing demand for our environmentally-friendly product. Getting the word out that we have an ongoing need to reuse old wood, resources that may otherwise go to waste, is an important part of our mission.”

According to [The New York Times](http://TheNewYorkTimes), the average American consumes an unsustainable one ton of wood products per year, typically in the form of paper, packaging, furniture, firewood and building materials.

George Chao says, “Reusing existing wood not only saves the harvesting of additional trees, but also releases fewer gasses in the disposal step, compared to burning wood for fuel (nitrogen dioxide, carbon dioxide) or allowing the wood to decompose and release greenhouse gasses like ammonia and methane. Reuse also keeps the wood out of landfills.”

For those with large quantities of waste wood, please contact \_\_\_\_\_ at (925) xxx-xxxx or email \_\_\_\_\_ at [recycle@reclaimarbor.com](mailto:recycle@reclaimarbor.com).
